## **Spatial Resilience in Social-Ecological Systems** Graeme S. Cumming

Spatial Resilience is a new and exciting area of interdisciplinary research. It focuses on the influence of spatial variation – including such things as spatial location, context, connectivity, and dispersal – on the resilience of complex systems, and on the roles that resilience and self-organization play in generating spatial variation. Prof. Cumming provides a readable introduction and a first comprehensive synthesis covering the core concepts and applications of spatial resilience to the study of social-ecological systems. The book follows a trajectory from concepts through models, methods, and case study analysis before revisiting the central problems in the further conceptual development of the field. In the process, the author ranges from the movements of lions in northern Zimbabwe to the urban jungles of Europe, and from the collapse of past societies to the social impacts of modern conflict. The many case studies and examples discussed in the book show how the concept of spatial resilience can generate valuable insights into the spatial dynamics of social-ecological systems and contribute to solving some of the most pressing problems of our time. Although it has been written primarily for students, this book will provide fascinating reading for interdisciplinary scientists at all career stages as well as for the interested public.

*"Graeme Cumming, central in the development of resilience thinking and theory, has produced a wonderful book on spatial resilience, the first ever on this topic. The book will become a shining star, a classic in the explosion of new ideas and approaches to studying and understanding social-ecological systems."*

Carl Folke, Stockholm Resilience Centre, Sweden

### **From reader reviews:**

#### **Suzanne Macdougall:**

The particular book Spatial Resilience in Social-Ecological Systems has a lot of information on it. So when you make sure to read this book you can get a lot of benefit. The book was written by the very famous author. Mcdougal makes some research prior to write this book. This book very easy to read you will get the point easily after scanning this book.

#### **Calvin Baker:**

People live in this new morning of lifestyle always try and and must have the extra time or they will get wide range of stress from both way of life and work. So , when we ask do people have time, we will say absolutely without a doubt. People is human not really a robot. Then we question again, what kind of activity have you got when the spare time coming to you of course your answer may unlimited right. Then do you ever try this one, reading books. It can be your alternative in spending your spare time, often the book you have read is usually Spatial Resilience in Social-Ecological Systems.

#### **Dewayne Campbell:**

Your reading sixth sense will not betray anyone, why because this Spatial Resilience in Social-Ecological Systems reserve written by well-known writer who knows well how to make book which can be understand by anyone who also read the book. Written inside good manner for you, leaking every ideas and writing skill only for eliminate your hunger then you still uncertainty Spatial Resilience in Social-Ecological Systems as good book not merely by the cover but also with the content. This is one reserve that can break don't determine book by its deal with, so do you still needing an additional sixth sense to pick that!? Oh come on your examining sixth sense already said so why you have to listening to an additional sixth sense.

#### **Melvin Hayes:**

Don't be worry in case you are afraid that this book will probably filled the space in your house, you will get it in e-book means, more simple and reachable. This Spatial Resilience in Social-Ecological Systems can give you a lot of friends because by you checking out this one book you have matter that they don't and make a person more like an interesting person. This kind of book can be one of a step for you to get success. This e-book offer you information that probably your friend doesn't understand, by knowing more than various other make you to be great folks. So , why hesitate? Let me have Spatial Resilience in Social-Ecological Systems.
