Radar Systems Analysis and Design Using MATLAB Second Edition

Bassem R. Mahafza

Radar Systems Analysis and Design Using MATLAB Second Edition Bassem R. Mahafza

An introduction to radar systems should ideally be self-contained and hands-on, a combination lacking in most radar texts. The first edition of Radar Systems Analysis and Design Using MATLAB® provided such an approach, and the second edition continues in the same vein. This edition has been updated, expanded, and reorganized to include advances in the field and to be more logical in sequence.

Ideal for anyone encountering the topic for the first time or for professionals in need of on-the-job reference, this book features an abundance of MATLAB programs and code. Radar Systems Analysis and Design Using MATLAB®, Second Edition presents the fundamentals and principles of radar along with enough rigorous mathematical derivations to ensure that you gain a deep understanding. The author has extensively revised chapters on radar cross-section and polarization, matched filter and radar ambiguity function, and radar wave propagation. He also added information on topics such as PRN codes, multipath and refraction, clutter and MTI processing, and high range resolution.

With all MATLAB functions updated to reflect version 7.0 and an expanded set of self-test problems, you will find this up-to-date text to be the most complete treatment of radar available, providing the hands-on tools that will enrich your learning.

From reader reviews:

Charles Wright:

In this 21st one hundred year, people become competitive in every way. By being competitive now, people have do something to make them survives, being in the middle of often the crowded place and notice through surrounding. One thing that oftentimes many people have underestimated this for a while is reading. Yes, by reading a publication your ability to survive improve then having chance to stay than other is high. In your case who want to start reading the book, we give you this Radar Systems Analysis and Design Using MATLAB Second Edition book as basic and daily reading book. Why, because this book is usually more than just a book.

Betty Richey:

The particular book Radar Systems Analysis and Design Using MATLAB Second Edition will bring you to definitely the new experience of reading a book. The author style to describe the idea is very unique. Should you try to find new book to see, this book very suited to you. The book Radar Systems Analysis and Design Using MATLAB Second Edition is much recommended to you you just read. You can also get the e-book in the official web site, so you can more easily to read the book.

Raymond Littlefield:

This Radar Systems Analysis and Design Using MATLAB Second Edition is great publication for you because the content and that is full of information for you who also always deal with world and have to make decision every minute. That book reveal it information accurately using great arrange word or we can claim no rambling sentences inside it. So if you are read that hurriedly you can have whole info in it. Doesn't mean it only provides straight forward sentences but difficult core information with lovely delivering sentences. Having Radar Systems Analysis and Design Using MATLAB Second Edition in your hand like keeping the world in your arm, facts in it is not ridiculous one particular. We can say that no book that offer you world with ten or fifteen moment right but this e-book already do that. So , it is good reading book. Hey there Mr. and Mrs. hectic do you still doubt which?

Dorothy Payne:

Is it a person who having spare time in that case spend it whole day by means of watching television programs or just lying on the bed? Do you need something totally new? This Radar Systems Analysis and Design Using MATLAB Second Edition can be the respond to, oh how comes? It's a book you know. You are thus out of date, spending your free time by reading in this fresh era is common not a geek activity. So what these publications have than the others?
