Functional Analysis: Introduction to Further Topics in Analysis (Princeton Lectures in Analysis) (Bk. 4) Elias M. Stein, Rami Shakarchi

This is the fourth and final volume in the Princeton Lectures in Analysis, a series of textbooks that aim to present, in an integrated manner, the core areas of analysis. Beginning with the basic facts of functional analysis, this volume looks at Banach spaces, L_p spaces, and distribution theory, and highlights their roles in harmonic analysis. The authors then use the Baire category theorem to illustrate several points, including the existence of Besicovitch sets. The second half of the book introduces readers to other central topics in analysis, such as probability theory and Brownian motion, which culminates in the solution of Dirichlet's problem. The concluding chapters explore several complex variables and oscillatory integrals in Fourier analysis, and illustrate applications to such diverse areas as nonlinear dispersion equations and the problem of counting lattice points. Throughout the book, the authors focus on key results in each area and stress the organic unity of the subject.

- A comprehensive and authoritative text that treats some of the main topics of modern analysis
- A look at basic functional analysis and its applications in harmonic analysis, probability theory, and several complex variables
- Key results in each area discussed in relation to other areas of mathematics
- Highlights the organic unity of large areas of analysis traditionally split into subfields
- Interesting exercises and problems illustrate ideas
- Clear proofs provided

From reader reviews:

Pearl Sanders:

Have you spare time for a day? What do you do when you have considerably more or little spare time? Yep, you can choose the suitable activity to get spend your time. Any person spent their spare time to take a walk, shopping, or went to the particular Mall. How about open or even read a book titled Functional Analysis: Introduction to Further Topics in Analysis (Princeton Lectures in Analysis) (Bk. 4)? Maybe it is being best activity for you. You already know beside you can spend your time together with your favorite's book, you can cleverer than before. Do you agree with their opinion or you have additional opinion?

Kimberly Hopkins:

Book is to be different for each and every grade. Book for children till adult are different content. To be sure that book is very important for all of us. The book Functional Analysis: Introduction to Further Topics in Analysis (Princeton Lectures in Analysis) (Bk. 4) had been making you to know about other information and of course you can take more information. It is quite advantages for you. The e-book Functional Analysis: Introduction to Further Topics in Analysis (Princeton Lectures in Analysis) (Bk. 4) is not only giving you far more new information but also to be your friend when you sense bored. You can spend your spend time to read your e-book. Try to make relationship while using book Functional Analysis: Introduction to Further Topics in Analysis (Princeton Lectures in Analysis) (Bk. 4). You never really feel lose out for everything should you read some books.

Beverly Harrison:

This Functional Analysis: Introduction to Further Topics in Analysis (Princeton Lectures in Analysis) (Bk. 4) are reliable for you who want to be considered a successful person, why. The explanation of this Functional Analysis: Introduction to Further Topics in Analysis (Princeton Lectures in Analysis) (Bk. 4) can be on the list of great books you must have is definitely giving you more than just simple reading food but feed you actually with information that might be will shock your previous knowledge. This book is actually handy, you can bring it just about everywhere and whenever your conditions throughout the e-book and printed people. Beside that this Functional Analysis: Introduction to Further Topics in Analysis (Princeton Lectures in Analysis) (Bk. 4) giving you an enormous of experience for example rich vocabulary, giving you trial run of critical thinking that we realize it useful in your day action. So , let's have it and revel in reading.

Barbera Champ:

Spent a free time to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their particular friends. Usually they carrying out activity like watching television, likely to beach, or picnic within the park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your own personal free time/ holiday? Could be reading a book could be option to fill your no cost time/ holiday. The first thing you ask may be what kinds of guide that you should read. If you want to

try out look for book, may be the guide untitled Functional Analysis: Introduction to Further Topics in Analysis (Princeton Lectures in Analysis) (Bk. 4) can be fine book to read. May be it is usually best activity to you.
