This book tells a different story than that of Mankind's recorded history. It challenges existing theories on such things as the Ice Ages, the related extinction of many animal species and drastic changes in climate conditions. A major impact event took place only 12,400 years ago, multiple large meteors impacted the Earth with such unimaginable force as to cause a change to Earth's Axis. These findings have been corroborated by one of history's most important monuments, The Great Pyramid of Giza. You will find compelling evidence that highly advanced civilizations existed before this event, civilizations that until now have always been considered a myth. Don't feed from the information trough; choose your own meal. The "Ice Ages" are the real myth.
