Restorative Neurology of Spinal Cord Injury

Restorative Neurology of Spinal Cord Injury

Following injury or disease, neural circuitry can be altered to varying degrees leading to highly individualized characteristics that may or may not resemble original function. In addition, lost or partially damaged circuits and the effects of biological recovery processes coupled with learned compensatory strategies create a new neuroanatomy with capabilities that are often not functional or may interfere with daily life. To date, the majority of approaches used to treat neurological dysfunction have focused on the replacement of lost or damaged function, usually through the suppression of surviving neural activity and the application of mechanical assistive devices. *Restorative Neurology of Spinal Cord Injury* offers a different and novel approach.

Focusing on the spinal cord and its role in motor control, the book details the clinical and neurophysiological assessment process and methods developed throughout the past half century by basic and clinical scientists. Then, through the use of specialized clinical and neurophysiological testing methods, conduction and processing performed within the surviving neural circuitry is examined and characterized in detail. Based on the results of such assessment, treatment strategies, also described in this book, are applied to augment, rather than replace, the performance of surviving neural circuitry and improve the functional capacity of people who have experienced injury to their spinal cords.

From reader reviews:

Otis Thompson:

Now a day those who Living in the era wherever everything reachable by connect to the internet and the resources inside can be true or not require people to be aware of each info they get. How individuals to be smart in acquiring any information nowadays? Of course the answer then is reading a book. Looking at a book can help persons out of this uncertainty Information specifically this Restorative Neurology of Spinal Cord Injury book as this book offers you rich info and knowledge. Of course the data in this book hundred % guarantees there is no doubt in it you know.

Michael Cardona:

The ability that you get from Restorative Neurology of Spinal Cord Injury is the more deep you looking the information that hide in the words the more you get serious about reading it. It doesn't mean that this book is hard to be aware of but Restorative Neurology of Spinal Cord Injury giving you joy feeling of reading. The article author conveys their point in a number of way that can be understood through anyone who read the item because the author of this e-book is well-known enough. This specific book also makes your personal vocabulary increase well. That makes it easy to understand then can go with you, both in printed or e-book style are available. We highly recommend you for having this specific Restorative Neurology of Spinal Cord Injury instantly.

Ronald Searle:

Your reading sixth sense will not betray you, why because this Restorative Neurology of Spinal Cord Injury book written by well-known writer who really knows well how to make book that can be understand by anyone who also read the book. Written inside good manner for you, dripping every ideas and writing skill only for eliminate your current hunger then you still hesitation Restorative Neurology of Spinal Cord Injury as good book but not only by the cover but also by content. This is one reserve that can break don't determine book by its protect, so do you still needing an additional sixth sense to pick this specific!?! Oh come on your examining sixth sense already said so why you have to listening to another sixth sense.

Carmen Dana:

Reading a publication make you to get more knowledge from this. You can take knowledge and information from a book. Book is created or printed or illustrated from each source that will filled update of news. In this modern era like at this point, many ways to get information are available for you actually. From media social similar to newspaper, magazines, science publication, encyclopedia, reference book, book and comic. You can add your understanding by that book. Do you want to spend your spare time to spread out your book? Or just searching for the Restorative Neurology of Spinal Cord Injury when you desired it?
