IMMUNOHEMATOLOGY AND BLOOD BANKING II

INTRODUCTION

Blood for transfusion is a biologically active therapeutic substance. It has specific effects on the human organism and dosage requirements, just as any other therapeutic substance. Blood differs, however, from other biologicals in that it must be obtained from healthy individuals of the human race. At our present state of knowledge, human whole blood is a perishable substance, and being derived from human beings, must be collected in thousands of widely spread laboratories, rather than being produced in a handful of qualified and well regulated laboratories. The responsibilities of those who collect, process, and issue whole blood for transfusion are tremendous.

Blood transfusion attempts are recorded as far back as the 16th century. At first, animal blood was transfused to humans. Later, human blood was used. However, facts concerning the characteristics of even human blood were not known, and these early transfusions frequently caused severe reactions, and often death.

It can be readily seen that immunohematology is a relatively new medical area, if one stops to consider that Landsteiner discovered three of the four blood groups in the ABO system in 1900. A year later the fourth blood group was discovered, but it was not until 1937 that the Rh factor was discovered. Since that time, tremendous strides have been made in the field of hematology and blood banking.

The safety of blood transfusion is directly proportional to the knowledge, skill, and sense of responsibility of the laboratory technicians. It is not sufficient to establish appropriate procedures and techniques. Continuous instruction and training are required, to assure highest quality and safety in performance of blood bank procedures. That is why, in this subcourse, instruction is concerned with immunohematology, the newborn, and blood transfusion for such.

Subcourse Components:

This subcourse consists of two lessons and an appendix.

Lesson 1, Immune Hemolytic Anemia and Hemolytic Disease of the Newborn.

Lesson 2, Blood Transfusion.

Appendix, Bibliography.

BLOOD DONOR OPERATIONS I

INTRODUCTION

Blood for transfusion is a biologically active therapeutic substance. It has specific effects on the human organism and dosage requirements just as any other therapeutic substance. Blood differs, however, from other biologicals in that it must be obtained from healthy individuals of the human race. The 1980's brought increasing complexity of blood banking operations and problems associated with assessment and management practices for donor suitability, deferral, and adherence to appropriate testing practices and prevention of inappropriate release of blood and blood components. The responsibilities of those who collect, process, and issue blood for

transfusion are tremendous.

The safety of blood transfusion is directly proportional to the knowledge, skill, and sense of responsibility of the laboratory technicians. It is not sufficient to establish appropriate procedures and techniques. Continuous instruction and training are required to assure the highest quality and safety in performance of blood bank procedures. That is why in this subcourse, instruction is concerned with blood donor center and transfusion service

activities, including preparation of blood products for transfusion therapy.

Subcourse Components:

This subcourse consists of three lessons, a glossary of blood banking terms and definitions, six annexes, a bibliography, and an examination. The lessons are:

Lesson 1, Donor Suitability and Blood Collection.

Lesson 2, Component Processing, Testing, Labeling, Storage, and Distribution.

Lesson 3, Compatibility Testing and Blood Transfusion.

From reader reviews:

Gene Kistler:

Here thing why this particular IMMUNOHEMATOLOGY, BLOOD BANKING & TRANSFUSION OPERATIONS are different and reputable to be yours. First of all examining a book is good however it depends in the content of it which is the content is as scrumptious as food or not.

IMMUNOHEMATOLOGY, BLOOD BANKING & TRANSFUSION OPERATIONS giving you information deeper since different ways, you can find any e-book out there but there is no publication that similar with IMMUNOHEMATOLOGY, BLOOD BANKING & TRANSFUSION OPERATIONS. It gives you thrill looking at journey, its open up your own personal eyes about the thing in which happened in the world which is might be can be happened around you. It is possible to bring everywhere like in park your car, café, or even in your method home by train. In case you are having difficulties in bringing the printed book maybe the form of IMMUNOHEMATOLOGY, BLOOD BANKING & TRANSFUSION OPERATIONS in e-book can be your substitute.

Geneva Milbourn:

The knowledge that you get from IMMUNOHEMATOLOGY, BLOOD BANKING & TRANSFUSION OPERATIONS could be the more deep you searching the information that hide in the words the more you get thinking about reading it. It does not mean that this book is hard to comprehend but IMMUNOHEMATOLOGY, BLOOD BANKING & TRANSFUSION OPERATIONS giving you buzz feeling of reading. The article author conveys their point in certain way that can be understood by simply anyone who read the item because the author of this book is well-known enough. This specific book also makes your current vocabulary increase well. That makes it easy to understand then can go along with you, both in printed or e-book style are available. We suggest you for having this specific IMMUNOHEMATOLOGY, BLOOD BANKING & TRANSFUSION OPERATIONS instantly.

Elaine Harvey:

Do you have something that you enjoy such as book? The reserve lovers usually prefer to choose book like comic, quick story and the biggest you are novel. Now, why not attempting IMMUNOHEMATOLOGY, BLOOD BANKING & TRANSFUSION OPERATIONS that give your entertainment preference will be satisfied by means of reading this book. Reading behavior all over the world can be said as the means for people to know world considerably better then how they react towards the world. It can't be mentioned constantly that reading practice only for the geeky individual but for all of you who wants to end up being success person. So , for every you who want to start looking at as your good habit, it is possible to pick IMMUNOHEMATOLOGY, BLOOD BANKING & TRANSFUSION OPERATIONS become your current starter.

Marc Medina:

Are you kind of busy person, only have 10 or maybe 15 minute in your moment to upgrading your mind expertise or thinking skill even analytical thinking? Then you are experiencing problem with the book compared to can satisfy your short period of time to read it because all this time you only find guide that need more time to be read. IMMUNOHEMATOLOGY, BLOOD BANKING & TRANSFUSION OPERATIONS can be your answer mainly because it can be read by anyone who have those short spare time problems.
