God and the Astronomers (New and Expanded Edition) Robert Jastrow

If every effect in science has a cause, what caused the birth of the Universe? Have scientists brought themselves face to face with the possibility of God?

In *God and the Astronomers*, Dr. Robert Jastrow, world-renowned astrophysicist, describes the astronomical discoveries of recent years and the theological implications of the new insights afforded by science into mankind's place in the cosmos. He explains the chain of events that forced astronomers, despite their initial reluctance ("Irritating," said Einstein; "Repugnant," said the great British astronomer Eddington; "I would like to reject it," said MIT physicist Philip Morrison) to accept the validity of the Big Bang and the fact that the universe began in a moment of creation.
