**Optical Networks: Architecture and Survivability** Hussein T. Mouftah, Pin-Han Ho

**Optical Networks - Architecture and Survivability**, is a state-of-the-art work on survivable and cost-effective design of control and management for networks with IP directly over Wavelength Division Multiplexing (WDM) technology (or called Optical Internet). The authors address issues of signaling mechanisms, resource reservation, and survivable routing and wavelength assignment. Special emphasis has been given to the design of meshed, middle-sized, and wavelength-routed networks with dynamic traffic in the optical domain, such as the next-generation Metropolitan Area Network.

Research and development engineers, graduate students studying wavelength-routed WDM networks, and senior undergraduate students with a background in algorithms and networking will find this book interesting and useful. This work may also be used as supplemental readings for graduate courses on internetworking, routing, survivability, and network planning algorithms.

### **From reader reviews:**

#### **Lidia Hill:**

This Optical Networks: Architecture and Survivability book is not really ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book is actually information inside this book incredible fresh, you will get information which is getting deeper anyone read a lot of information you will get. This Optical Networks: Architecture and Survivability without we realize teach the one who looking at it become critical in considering and analyzing. Don't be worry Optical Networks: Architecture and Survivability can bring if you are and not make your tote space or bookshelves' turn into full because you can have it with your lovely laptop even cell phone. This Optical Networks: Architecture and Survivability having excellent arrangement in word as well as layout, so you will not sense uninterested in reading.

#### **Eleanor Yoo:**

People live in this new time of lifestyle always aim to and must have the time or they will get wide range of stress from both day to day life and work. So , if we ask do people have time, we will say absolutely of course. People is human not really a robot. Then we ask again, what kind of activity are you experiencing when the spare time coming to anyone of course your answer will certainly unlimited right. Then do you try this one, reading publications. It can be your alternative throughout spending your spare time, the actual book you have read will be Optical Networks: Architecture and Survivability.

#### **Alice Winfield:**

Do you have something that that suits you such as book? The guide lovers usually prefer to select book like comic, quick story and the biggest one is novel. Now, why not striving Optical Networks: Architecture and Survivability that give your fun preference will be satisfied simply by reading this book. Reading addiction all over the world can be said as the opportunity for people to know world much better then how they react toward the world. It can't be explained constantly that reading practice only for the geeky individual but for all of you who wants to be success person. So , for all you who want to start looking at as your good habit, you may pick Optical Networks: Architecture and Survivability become your personal starter.

#### **Joseph Rankins:**

You could spend your free time to read this book this guide. This Optical Networks: Architecture and Survivability is simple to bring you can read it in the recreation area, in the beach, train along with soon. If you did not have got much space to bring typically the printed book, you can buy the actual e-book. It is make you much easier to read it. You can save the particular book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.
