Mouse as a Model Organism: From Animals to Cells

Mouse as a Model Organism: From Animals to Cells

Cell culture based research is important for our understanding of biological processes at the cellular and molecular level. Using this approach, the previous decades have produced a wealth of mechanistic information in all areas of biomedical research. Such in vitro research, however, lacks the complexity of in vivo investigations, where many different cell types interact with each other in a normal, three-dimensional environment, with normal levels of cytokines and growth factors. Furthermore, complex human diseases, such as cancer, diabetes or chronic inflammation, can only be modeled in vivo. Due to its small size, its short reproduction time, and the possibility to introduce specific gene mutations, the mouse has become the favourite mammalian model organism to study in vivo function of genes during development and in disease. This book combines review articles on selected subjects presented at the symposium "Mouse as a Model Organism – From Animals to Cells", held in Rovaniemi, Finland, 2009. Among other topics, highthroughput phenotyping of mouse mutants, mouse phenotypes dependent on nature and nuture, and a spectrum of in vivo, ex vivo and in vitro methods to study cancer in mice are described. This book will give an excellent introduction to scientists interested in the use of mice as a model to understand complex biological questions in the post-genomic era. It will highlight the possibilities, but also discuss the current problems and shortcomings, to give a realistic view of the current state-of-art in this fascinating field of biomedical research.

From reader reviews:

Sheila Carter:

Why don't make it to become your habit? Right now, try to prepare your time to do the important act, like looking for your favorite e-book and reading a guide. Beside you can solve your condition; you can add your knowledge by the e-book entitled Mouse as a Model Organism: From Animals to Cells. Try to make the book Mouse as a Model Organism: From Animals to Cells as your pal. It means that it can being your friend when you truly feel alone and beside those of course make you smarter than previously. Yeah, it is very fortuned in your case. The book makes you far more confidence because you can know anything by the book. So, let us make new experience and also knowledge with this book.

Robert Sanders:

Would you one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Try and pick one book that you just dont know the inside because don't judge book by its handle may doesn't work here is difficult job because you are frightened that the inside maybe not because fantastic as in the outside look likes. Maybe you answer could be Mouse as a Model Organism: From Animals to Cells why because the wonderful cover that make you consider regarding the content will not disappoint an individual. The inside or content is fantastic as the outside as well as cover. Your reading sixth sense will directly direct you to pick up this book.

Willard Edwards:

In this time globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The healthiness of the world makes the information easier to share. You can find a lot of sources to get information example: internet, newspaper, book, and soon. You will observe that now, a lot of publisher in which print many kinds of book. The book that recommended to your account is Mouse as a Model Organism: From Animals to Cells this publication consist a lot of the information of the condition of this world now. This specific book was represented how do the world has grown up. The words styles that writer make usage of to explain it is easy to understand. The particular writer made some exploration when he makes this book. This is why this book suitable all of you.

Richard Dean:

Reading a reserve make you to get more knowledge from the jawhorse. You can take knowledge and information from the book. Book is written or printed or illustrated from each source that filled update of news. On this modern era like right now, many ways to get information are available for an individual. From media social similar to newspaper, magazines, science book, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just seeking the Mouse as a Model Organism: From Animals to Cells when you desired it?
