What is an Age? Astronomers tell us that our sun and his family of planets revolve around a central sun, which is millions of miles distant, and that it requires something less than 26,000 years to make one revolution. His orbit is called the Zodiac, which is divided into twelve signs, familiarly known as Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricorn, Aquarius and Pisces. It requires our Solar System a little more than 2,100 years to pass through one of these signs, and this time is the measurement of an Age or Dispensation. Because of what Astronomers call "the precession of the Equinoxes" the movement of the sun through the signs of the Zodiac is in order reverse from that given above. Exact Time of the Beginning of an Age. Regarding this matter there is a disagreement among astronomers; but in this Introduction we are not called upon to give the reasons of the various investigators for their opinions, there are enough well authenticated facts for our present purposes. It is conceded by all critical students that the sun entered the zodiacal sign Taurus in the days of our historic Adam when the Taurian Age began, that Abraham lived not far from the beginning of the Arian Age, when the sun entered the sign Aries. About the time of the rise of the Roman empire the sun entered the sign Pisces, the Fishes, and the Piscean Age began, so that early in this Age Jesus of Nazareth lived.
