## **Control of Batch Processes** Cecil L. Smith

Gives a real world explanation of how to analyze and troubleshoot a process control system in a batch process plant

- Explains how to analyze the requirements for controlling a batch process, develop the control logic to meet these requirements, and troubleshoot the process controls in batch processes
- Presents three categories of batch processes (cyclical batch, multigrade facilities, and flexible batch) and examines the differences in the control requirements in each
- Examines various concepts of a product recipe and what its nature must be in a flexible batch facility
- Approaches the subject from the process perspective, with emphasis on the advantages of using structured logic in the automation of all but the simplest batch processes.
- Discusses the flow of information starting at the plant floor and continuing through various levels of the control logic up to the corporate IT level
