Outbreak!: The Science of Pandemics (Headline Science) Darlene R. Stille

Did you ever wake up one morning not feeling well? The doctor said you most likely had the flu. You stayed home from school. Many of your classmates also stayed home sick. On the television news that night, you heard that flu had been declared a pandemic. A pandemic is an outbreak of a disease that affects whole continents or even the entire world. Controlling pandemics takes the cooperation of everyone, from the government to the individual. Headline Science uses news stories and everyday applications to explain the science behind pandemics.
