Family, Kinship and Marriage in India (Oxford in India Readings in Sociology and Social Anthropology)

India is the second most populous nation in the world, but the dynamics of Indian daily life are not understood by many in the West. This work examines various aspects of Indian families: how they are organized, how property is distributed in marriage, and the structure and change of the household. It develops each aspect with a discussion of regional differences and classic writings in the field. Clearly written, this work is helpful to all those interested in families, social alliances, and comparative studies.
